

## Presenter Expert. Red laser with cursor control

K72425AM

### Product Description

Take control of the room—and your computer's cursor— with the Kensington Presenter Expert Red Laser Presenter with Cursor Control. The best wireless presenter is the one you don't have to think about because everything is intuitive. The Kensington Presenter Expert is just that. Now you can focus on wowing your audience rather than focusing on the operation of your presenter. The simple four-button design makes it easy to navigate your Keynote® or PowerPoint® presentation. And the red laser helps you make your point from across the room. But sometimes pointing just isn't enough. That's where the Presentation Expert's cursor control comes into play. With a simple flick of a switch, you'll toggle between presentation and cursor control modes. The powerful 2.4Ghz remote resists interference and lets you control Keynote or PowerPoint from up to 150 feet (50 meters) away. The USB receiver stores inside the presenter so you won't have to worry about losing it. Dark rooms can be a challenge for some wireless presenters. But the Kensington Presenter Expert has backlit buttons so you'll always find the correct button. There's also a low battery indicator to eliminate surprises. And the whole thing packs in a handy carrying pouch.
